INVESTMENT UNIVERSE AND INVESTMENT OBJECTIVE

The investment objective of the sub-fund is to achieve long-term positive returns of more than 5% with a moderate level of risk. The fund takes advantage of a broad and diversified investment structure of equities, bonds, currencies and commodities on a global scale, as opposed to using specific benchmark indices. In so doing, the fund's equity and currency allocation may be strategically hedged using futures contracts. The portfolio management selects individual investments based on fundamental criteria with a focus on steady growth. The fund uses a combination of bottom-up and top-down research and the analysis of structural trends. In the selection and allocation of the investments, emphasis is placed on the attractiveness of the risk/reward profile.

Risk indicator¹⁾

SRI (Summary Risk Indicator) scale from 1 (lowest risk) to 7 (highest risk); Risk 1 does not mean a risk-free investment. This indicator may change over time.
